

The Oracle Commerce Cloud PayPal app, powered by Braintree, combines gateway and payment processing into one solution to create a one stop-shop for all payment needs. This can increase sales and reduce operating costs, while delivering Braintree's brand of personalized customer service and support.

See how you can boost revenue with a global payments partner.

Getting Started

Interested in accepting both PayPal and Credit Card?

- Apply for a Braintree account at <https://www.braintreepayments.com/>.
- If you already have a Braintree account, follow the steps per the Integration Guide.

Interested in accepting PayPal only?

- Create a PayPal Business account <https://www.paypal.com>.
- If you already have a PayPal account, follow the steps per the Integration Guide.

Key Features

PayPal and PayPal Credit¹ Processing

Accept PayPal payments and see why 19 million merchants use PayPal to build, run, and grow their business.

Vaulting and Tokenization

Our vault securely stores customer and payment method information so you can safely keep customers on file.

Credit Card Processing with Hosted Fields (PCI SAQ A-level compliance)

Customize the look and feel of your web page while helping you comply with PCI requirements.

Multi-Currency Support

Accept and support multiple currencies by setting up merchant accounts and managing them all in one gateway.

About Braintree, a PayPal Service

Backed by the scale of PayPal, Braintree simplifies payments for merchants by providing a full-stack payments platform through a single relationship, replacing the traditional model of sourcing a payment gateway and merchant account from different providers. Our solution allows us to reduce costs while providing industry-leading features and white-glove support.

Braintree provides merchants with access to PayPal and card processing in over 44 markets and over 130 currencies worldwide. By leveraging Braintree's robust gateway, custom fraud tools, advanced PCI compliance and award-winning customer service, customers can increase sales while reducing cost and complexity.
